**Lung Cancer Low Dose CT Screening**

**Your Screening Is Scheduled:**

Date: ____________________________

Time: ____________________________

Location: ____________________________

www.cancerspecialistsnf.com
WHAT IS LOW DOSE LUNG CT?

Low dose lung CT means that the scan utilizes very little radiation to obtain a high resolution, 3-D image of the lungs with minimal negative side effects on the patient.

WHY IS IT IMPORTANT?

1 in every 14 people will be diagnosed with lung cancer during their lifetime. Annual low dose CT lung screenings in high risk patients has shown to decrease cancer death by 20% compared with using traditional chest X-Rays.

WHO IS ELIGIBLE?

- Adults age 55-80 years AND
- Current smokers OR
- Former smokers who have quit within the past 15 years
- Smoking history of at least 30 pack years (1 pack a day for 30 years, 2 packs a day for 15 years)

WARNING SIGNS & SYMPTOMS*

- Persistent or Worsening Cough
  If you have a new, persistent, or worsening, chronic cough, talk with a doctor.

- Bronchitis Respiratory Infections
  Chronic respiratory infections are a sign that something may be happening in your lungs.

- Change In Daily Physical Well-being
  Unexplained weight loss, fatigue, and breathing difficulties, such as shortness of breath or wheezing, are all physical signs you should take note of.

- Chest Pain or Coughing Up Blood
  Symptoms such as chest pain or coughing up blood can be signs of lung cancer or another disease. Seek medical attention if you experience either of the above symptoms.

HOW TO PREPARE FOR YOUR SCREENING

- Medication
  Continue taking regular medication as prescribed by your physician.

- Food & Drink
  There are no food or drink restrictions.

- Arrival Time
  Please arrive 10-15 minutes prior to your scheduled appointment.

- Attire
  Wear warm, comfortable, loose-fitting clothing that is free of metal. Leave jewelry & valuables at home.

*Warning signs and symptoms of lung cancer can vary depending on where and how widespread the tumor is.

COMMON QUESTIONS

What Is The Cost Of The Screening?

Most insurance carriers do cover the cost of low dose CT screening. However, if you do not meet the eligibility requirements and would like the scan, you will be charged $125, payable at the time of service. This includes the scan and radiologist interpretation fees.

What If I’m Claustrophobic?

Please consult your physician prior to your scan. Claustrophobic patients may need to obtain a prescription from their doctor before the appointment. If you receive a prescription, you will need to have a family member or friend accompany you to the appointment in order to drive you home. Please do not drive after taking any sedative.
